

By **BBC Scotlandshire Journalists**, *Their Revolting Correspondents*

**While our bosses were in the Executive Dining Room, we took the opportunity to look through their drawers. We were shocked by what we found.**

Smears were evident in the most remarkable places, and suggested an outbreak of fear defecation.

Scientists have long been aware that fear stimulates a release of corticotrophin releasing factor from the hypothalamus. This in turn activates parasympathetic nerve endings to enhance colonic motility, leading to Unionists shitting themselves.

Investigating futher, we discovered an email from UKOK head Alastair Darling to our Head of News, warning them that independence supporters no longer seemed able to be browbeaten, bullied, threatened, and lied to by the rich and powerful. "That's the end of my career!", said Darling. The email linked to a [National Collective article](#) - a site we had been forbidden to look at.

Not being bullied sounded a pretty good (if new) idea to us, so we all signed this message of support to the artists and creatives at National Collective.

Due to the huge number of complaints, comments are no longer banned on BBC Scotlandshire News pages.

{fcomment}

**Comments or no comments, it's still OUR job to tell YOU what to think - NOT the other way around, say the bosses. Some of us are starting to think for ourselves though!**
