

By ***M Aye Fyffe***, our National Security Consultant

The BBC has been passed a file containing a large number of rude and even disrespectful comments pertaining to various Unionist politicians.

The dossier, which was compiled by the Labour Party in Scotlandshire, is under embargo until tomorrow (Sunday). However, as the BBC is well known for being ahead of its time, we have decided to publish it today.

In its 51 pages, the document chronicles some of the most vile and despicable statements ever made on social media. These were all penned by Yes supporting members of the SNP, under

the personal direction of ex-leader Alex Salmond.

Incredibly and undeservingly, the abuse is mainly aimed at Scottish Labour politicians and their friends in other parties, such as the leaders of the Scottish Conservatives and UKIP.

We spoke to Blare McDonut, the man who initiated Project Smear and who was responsible (behind the scene) for Labour's recent electoral success in Scotlandshire.

It was Blare, in a moment of genius, who suggested traducing the reputation of an SNP candidate by lying about his Twitter history, thus allowing SLab to retain up to one of their forty-one MPs.

McDonut told us: "Having lost all self-respect during the referendum campaign, then all political influence in the subsequent election, we felt a moral responsibility to expose the behaviour of these dreaded cybernats, for it is they, and they alone, who are to blame for our decline.

"We spent months trawling the internet histories of suspected SNP members. [*Shouldn't that be 'trolling'? ED*]

This dossier contains the fruits of those labours – some of the most disgusting language ever seen on social media.
